Orditach Personal Manual

Usage

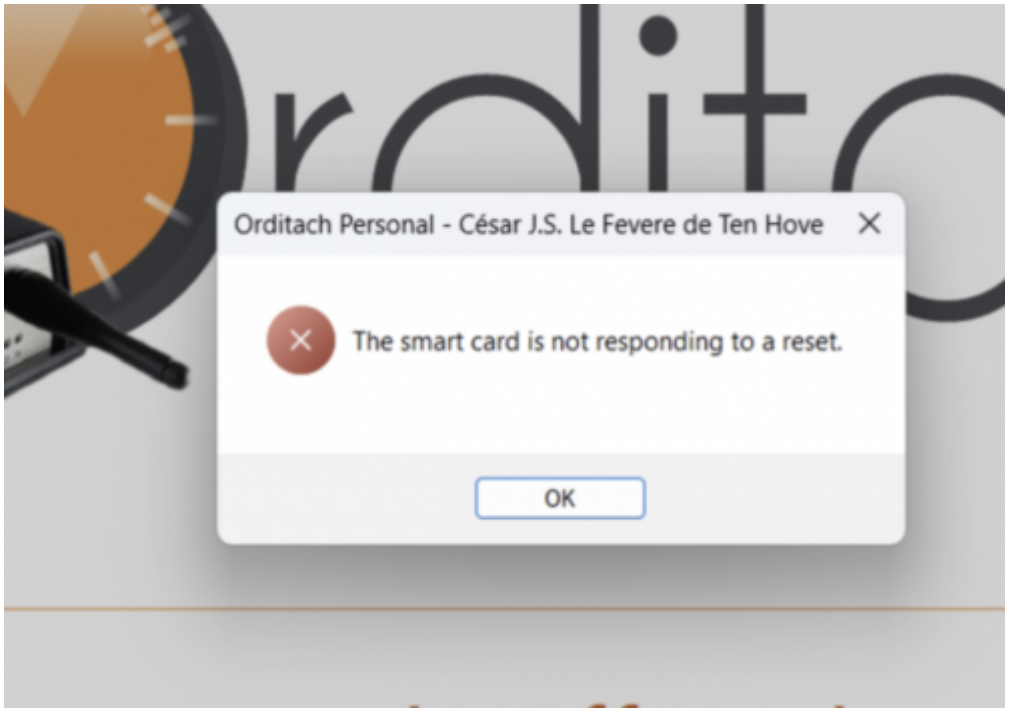

1. Insert the card reader with the SD card into your computer.
    1. It also works if you insert the SD card directly into your computer and use your own card reader.
2. Launch the application 

3. Select the desired language 

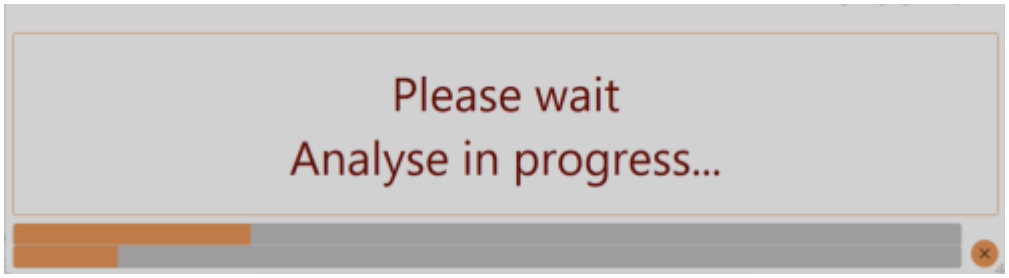

4. Insert the driver card into the card reader. **NOTE: Only one card can be linked per Orditach Personal.**
    1. The reading and analysis of your driver card will start automatically.

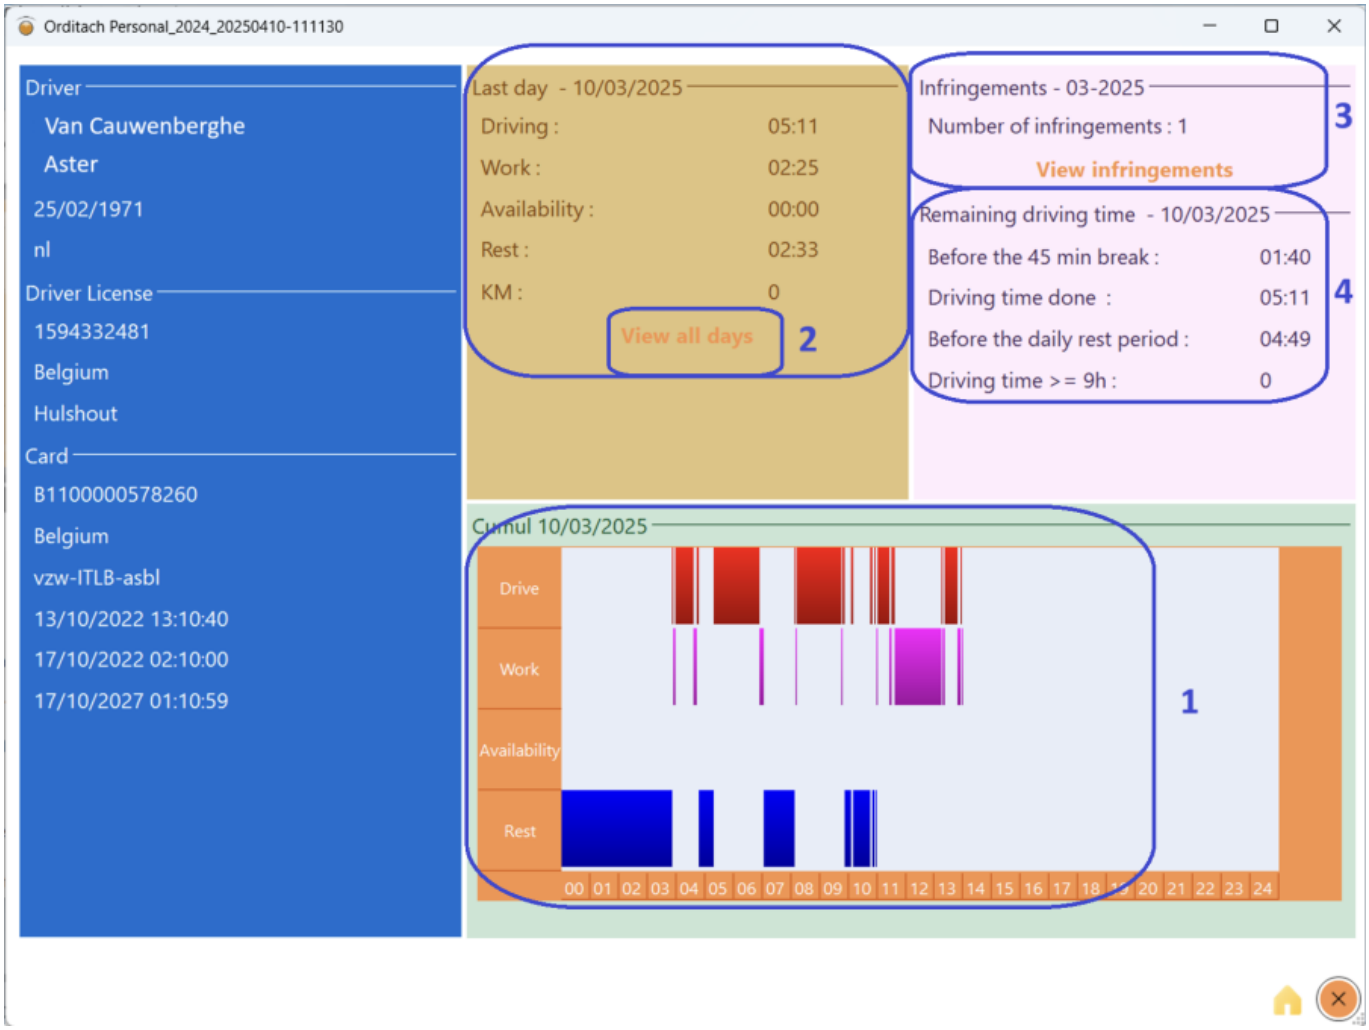

If the card is inserted incorrectly, you will get the following message:

If the card is inserted correctly, it will be read. Note: No data will be deleted or stored from the card!

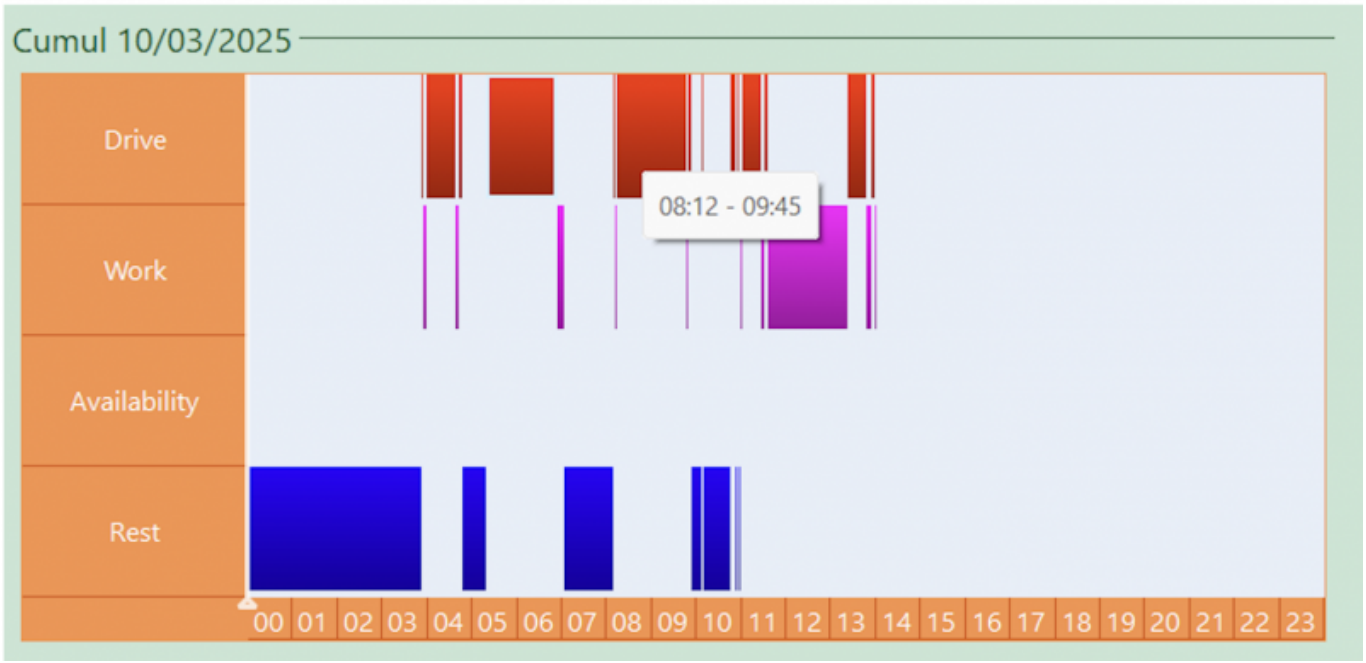

1. View the summary of the current/last day
2. You can analyze each day in detail
3. Immediately check your driving and rest time violations for this month
4. View your remaining driving time

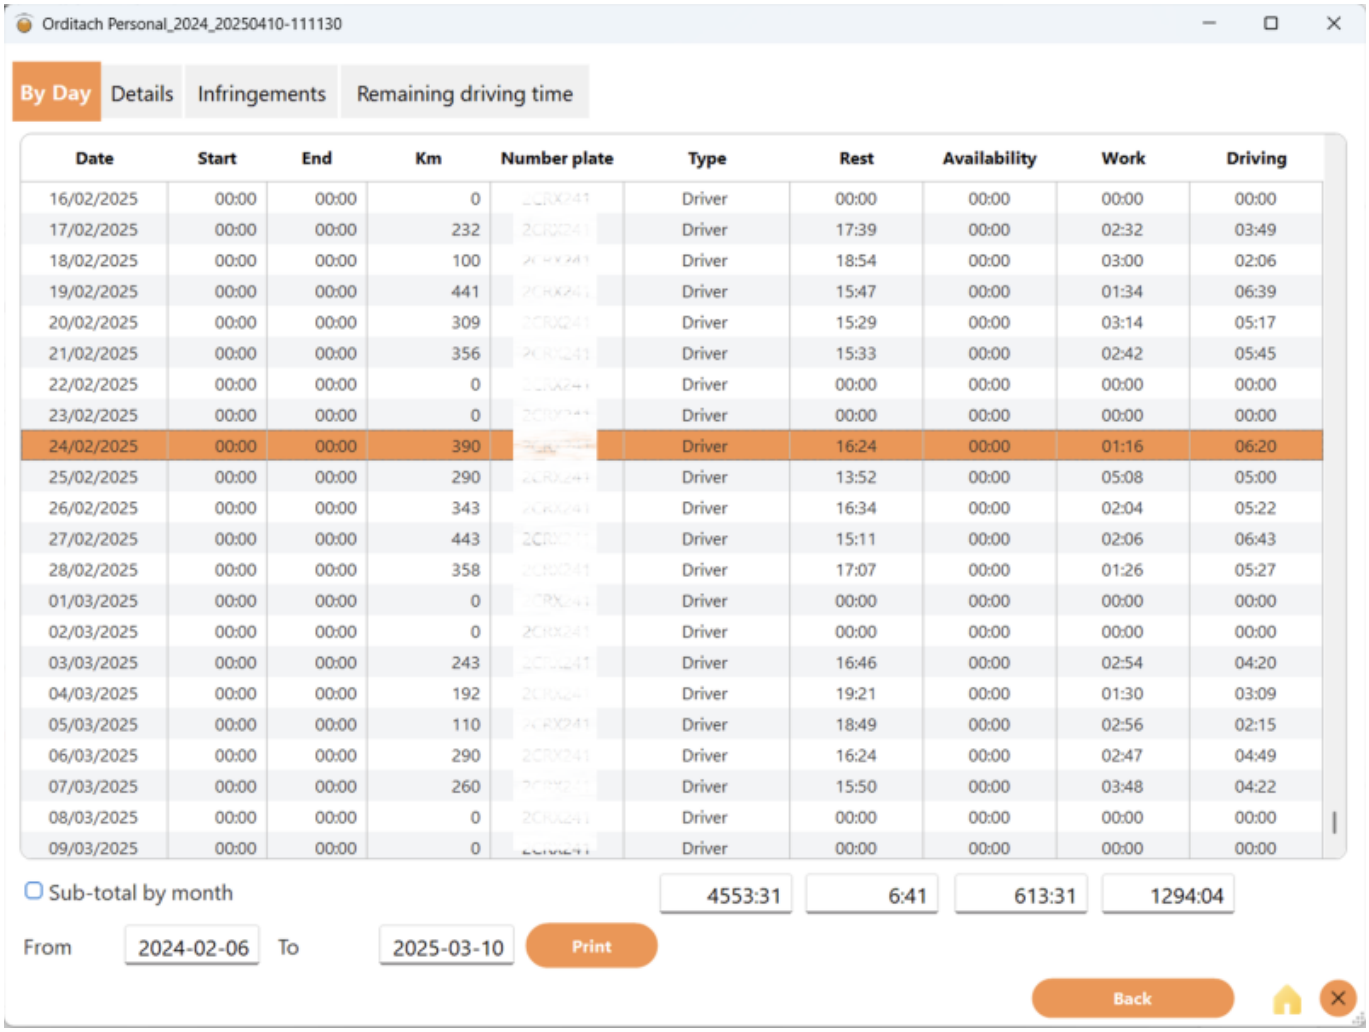

1. Summary of the current/last day

When you hover over the activity with the mouse, you can immediately see the start and end time of the activity.

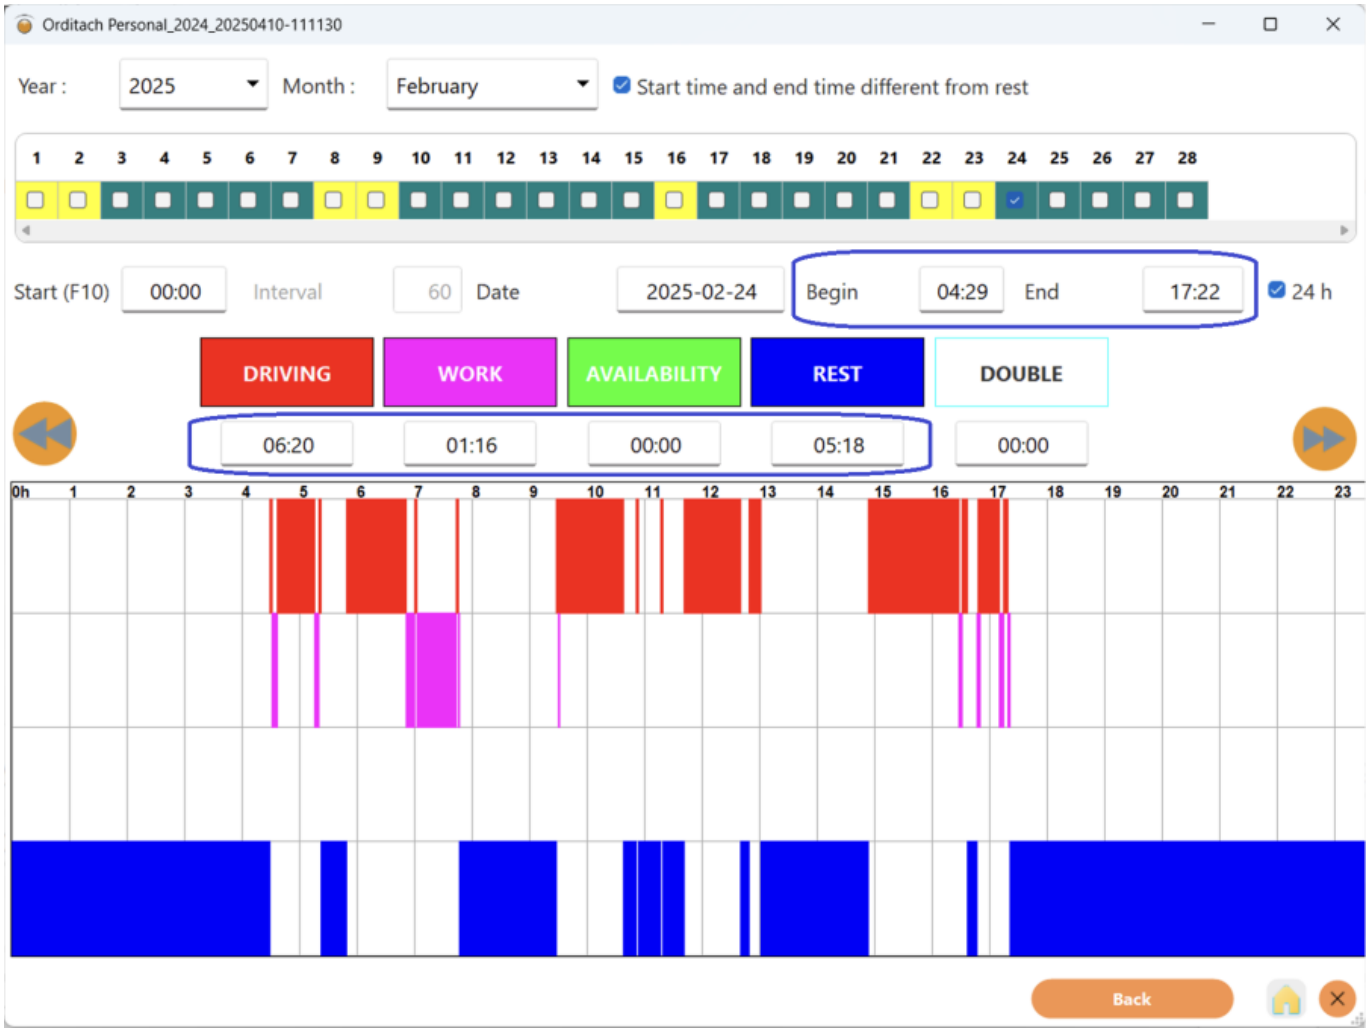

2. Overview of each day

- Note: when you have added manual rest on your card, the registration number will be shown as “unknown”.

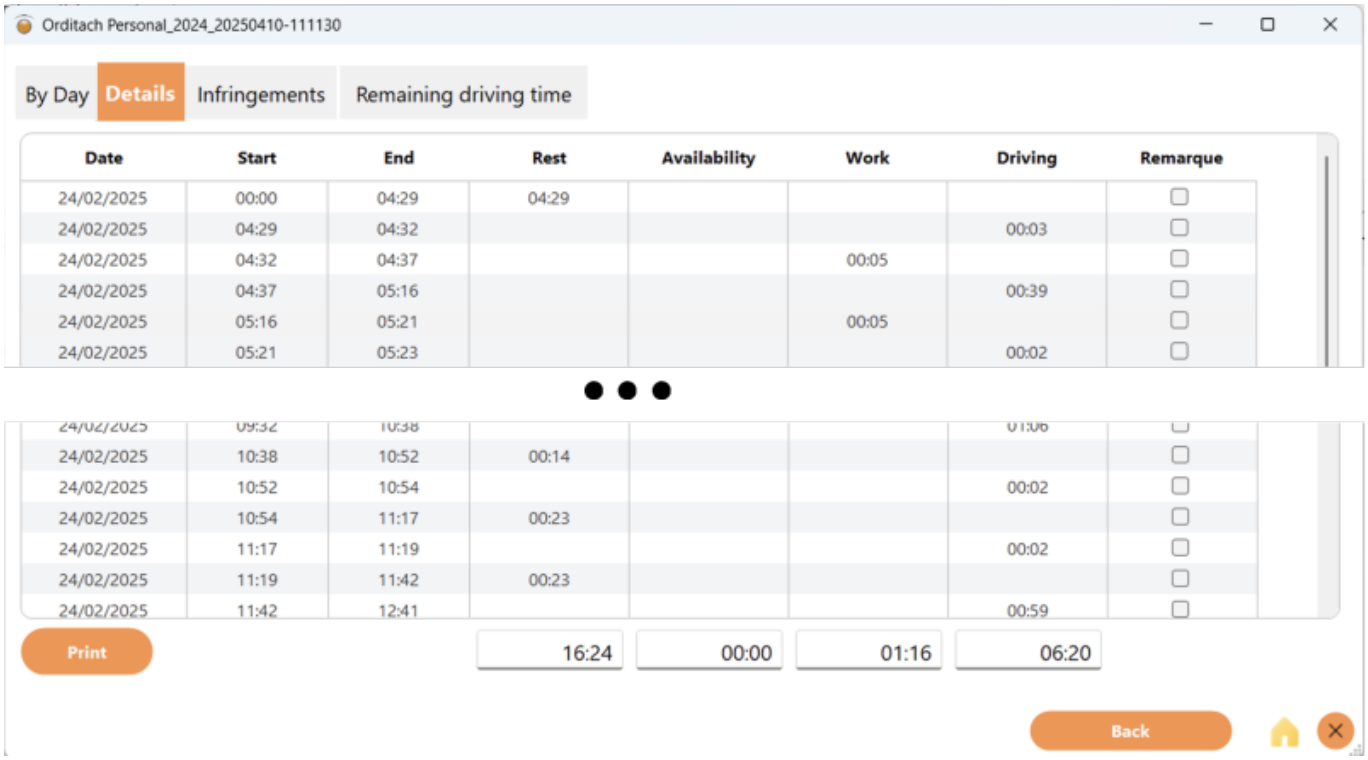

When you double-click on a specific date, a graphical view of that day can be requested, showing:

1. start and end time
2. driving time
3. working time
4. availability time
5. rest

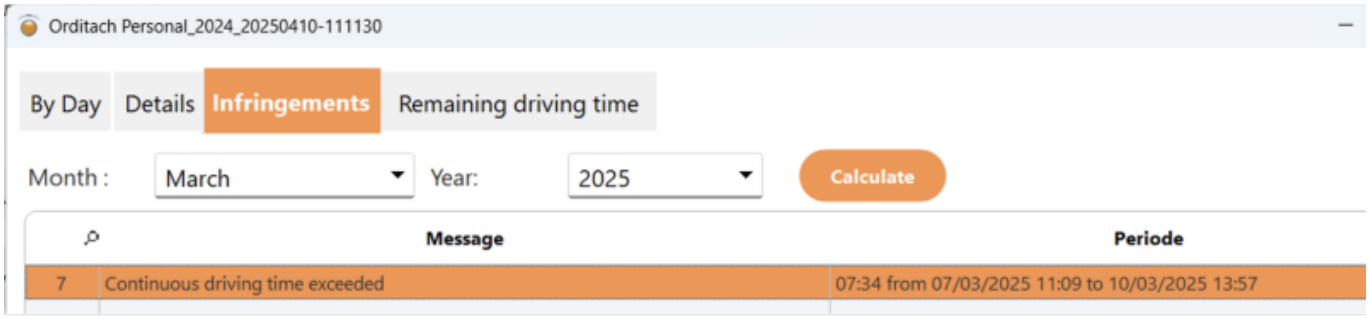

3. Details of the selected date

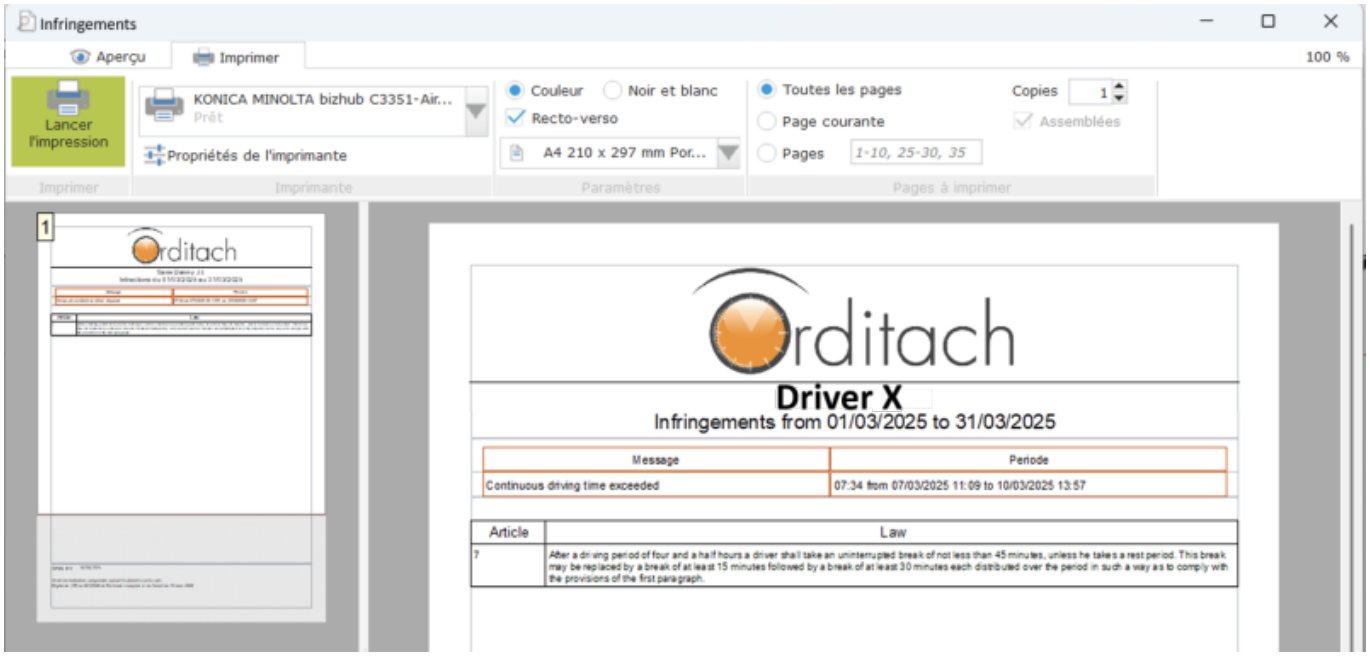

showing the details of that day and the totals at the bottom, which you can print.

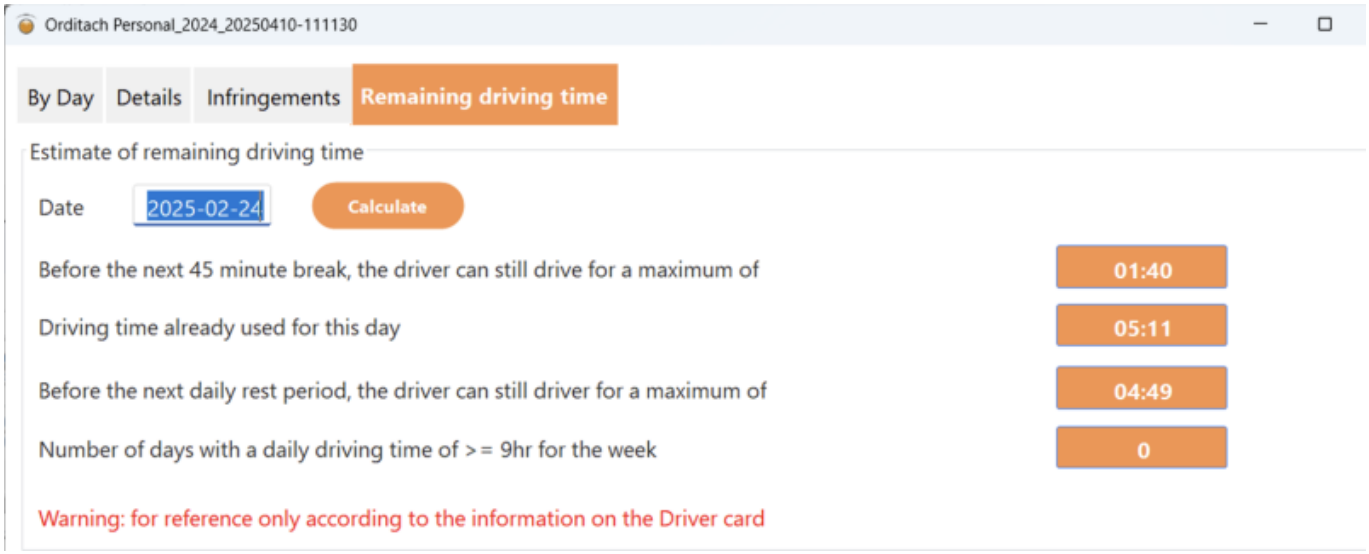

4. Infringements

Using the **Print** button, you can also print the legal article.

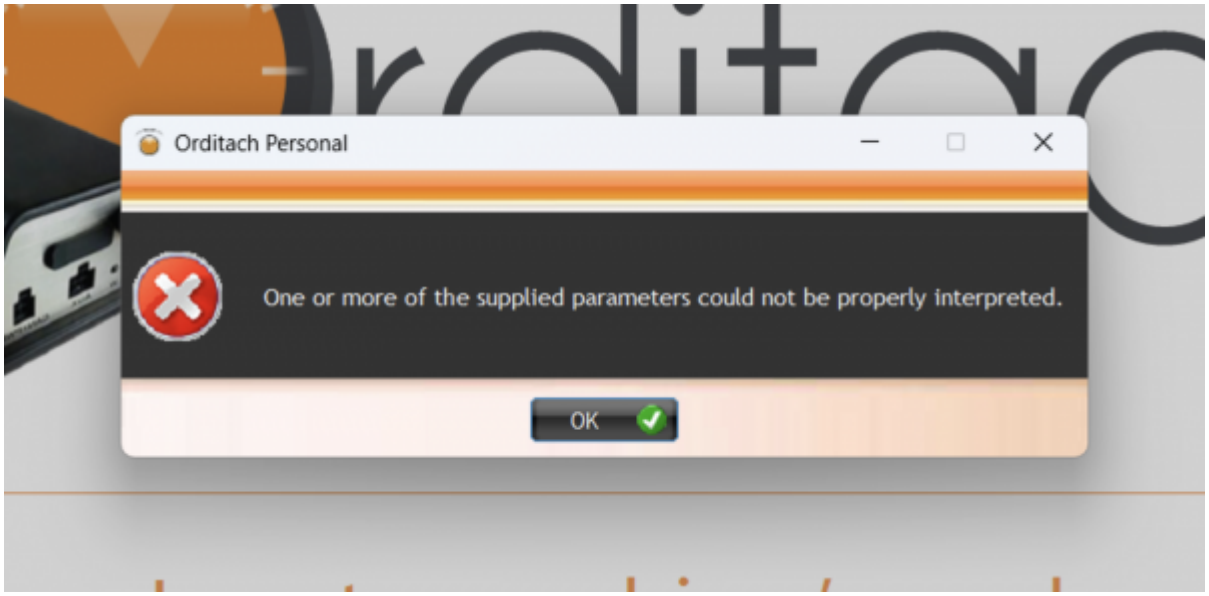

5. Remaining driving time

Troubleshooting

If you get this message, it means another card reader is causing a conflict. Disconnect it and click “OK”.

If the card is inserted incorrectly, you will see the following message:
